Emergency, Maintenance and Chemical Management System

"Compliance Made EASY"

EMC³ © Core Areas:

Emergency Management

Maintenance Management

Chemical Management

This Emergency, Maintenance and Chemical Management System crosses over three agencies -- EPA, OSHA, and DOT -- and institutes a behavioral-based online training program through an online LMS. This system adapts to your existing management structure and is instituted in a matter of hours... not weeks with little or no compliance experience.

You get: Policy, Training, Curriculums, PowerPoints, Easy Explanations, Instructional Forms, Audit Checklists and Records Management Abilities with your EMC³ purchase.

Solutions for Policy and Training Compliance

This EMC³ system was designed to meet the compliance requirements for the Department of Transportation (DOT), Environmental Protection Agency (EPA) and Occupational Safety and Health Administration (OSHA). The system documents the written compliance policies, training and mandatory records management.

Includes: Chemical Inventory, Maintenance and Emergency Management Methodologies and Tools

The EMC³ management system will reduce unnecessary repetitive training and cross over between the written program requirements, while establishing a tracking system for training and record keeping management. It will free up time for other responsibilities without jeopardizing safety or the environment, and implementing a culture of employee empowerment.

"When you cross agency train, you can reduce your training time in half, while increasing safety awareness."
